

# eBusiness Solutions

eBusiness is simply leveraging applications and communication technology to meet your business needs. What does that mean to you? As your authorized Swagelok sales and service center, we are ready to help you research, specify, and purchase Swagelok fluid system components any way you want.

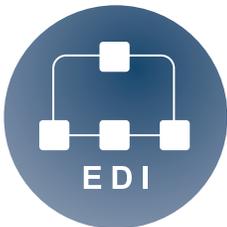

We offer a variety of methods to make your transactions painless, safe and efficient from purchasing online at [Swagelok.com](http://swagelok.com) to linking to your punchout system or even integrating with your business system through EDI - let us work with you to identify the best solution for your business.

## eStore at <http://swagelok.com>

Quick, easy access to thousands of reliable fluid system components. Edmonton Valve & Fitting is proud to offer you access to the Swagelok eStore, a 24-hour connection to research, quote, and purchase Swagelok fluid system components on the Web.

Accessible via <http://swagelok.com>, the eStore lets you track orders or quotes, reorder, and review your purchase history. With the eStore you can also access product literature, sales drawings, CAD templates; search, specify, buy or quote products; provide special instruction with your orders and more.

## EDI - eBusiness your way

System-to-system integration, no re-keying necessary. Swagelok supports a full range of Electronic Data Interchange (EDI/EDIFACT/XML) capabilities—from quotes and orders to invoices and remittances. Our EDI transactions go directly into a business system resulting in faster and more accurate orders.

With EDI/EDIFACT, you do not have to configure your system to ours. We will configure our system to yours. Ordering, invoicing, and tracking, our system seamlessly integrates with your system, making EDI/EDIFACT even more convenient and reliable.

## Punchout (Roundtrip)

Seamlessly interface a HTTPS\* encrypted punchout website with your buying application or procurement software. Swagelok® has many years of experience successfully linking with SAP, Oracle, Ariba and other leading procurement punchout systems. Punchout is shopping on an encrypted website which is linked to your Enterprise Resource Planning (ERP) system.

The Punchout solution is designed to get you doing business quickly. It's a hosted, full-featured, business-to-business web storefront that is used for shopping. It has all of the Swagelok shopping cart functionality that you would expect from a web store, plus custom catalog, custom pricing, and a streamlined (custom punchout) interface that is customized to meet your requirements.

## Marketplaces

Allow the connection of buyers and sellers from disparate locations through a paid third party provider. Swagelok has linked with providers such as Ariba, Hubwoo and Unimarket.

Allows both shopping and/or electronic transactions between trading partners.

## How to Register on Swagelok.com

We encourage you to take full advantage of our website by registering for an account. Anyone can register and completing the entire registration form gives you the many online tools at your fingertips, such as ordering online, requesting quotes, storing favorite products, storing custom part numbers, saving and forwarding your shopping cart, and more.

### STEP 1:

To register online with Edmonton Valve & Fitting, go to [Swagelok.com](http://Swagelok.com), and select the **'Log In'** or **'Register'** button on the top right-hand side of the screen. A pop up will appear. Click **'Continue to Swagelok.com'**.

### STEP 2:

Select **'Register Now'** and enter your personal details to complete the **'Registration Form'**. You will be asked to set your own memorable password and ID.

### STEP 3:

Please read and accept the 3 site policies and select **'I'm not a robot'**. Follow the on screen instructions then click **'Register'**.

## How to Upload Parts

A key benefit to having an account on Swagelok.com is the ability to easily upload your parts list that will tie directly into our business system to process as a quote or order. Using the eStore also gives you the ability to review and reference your purchase history.

### STEP 1:

Select **'My Account'** then **'Upload Part List'**. This will direct you straight to the how to upload a part list instructions.

### STEP 2:

Download the Microsoft excel template. Use the formatted layout contained within the document to input your order. **Save the file in a Text Format.**

### STEP 3:

Browse to search for the saved file and click **'Upload to Cart'** or **'Upload to Quote'**.

You can also add parts and notes by clicking **'Bill of Materials'**.
